

32-37 HEAD LIGHT, ELECTRICAL WIRING
 TERMINAL PLATE. TYPICAL WIRING
 COLOR CODES.

ELECTRICAL TERMINAL WIRING END.

OPERATION OF HEAD LIGHT SWITCH:

- ONE MOVE C.W. FROM OFF = PARK LIGHTS.
- ONE MOVE C.C.W. FROM OFF = LOW BEAM
- TWO MOVES C.C.W. FROM OFF = HIGH BEAM

NOTE:

THE 37-39 FORDS DO NOT USE THE BG-HIGH BEAM TERMINAL. THE BR-LOW BEAM TERMINAL GOES TO THE FOOT SWITCH AS YB COLOR CODE. THE SWITCH OUTER HOUSING PREVENTS THE SWITCH FROM GOING INTO THE UNUSED BG-HIGH TERMINAL
